DATA SHEET

Mercury Batteries

Mercury batteries are commonly found in calculators, hearing aids, and watches.

Spent or used Mercury batteries rated above 9-volts must be packaged so the terminals cannot contact each other through taping the terminals with non-conductive tape, individual bagging, placing non-conductive caps on the terminals, or packaging the used batteries in the original package.

Spent or used Mercury batteries should be shipped in using the following U.S. Department of Transportation shipping description: UN3077, ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S. (MERCURY BATTERIES) 9, **PGII**
